How to Eat Candy

Depriving cariogenic bacteria of sugar is the cornerstone of traditional caries management, yet the science of CAMBRA (Caries Management By Risk Assessment) takes cariology to a whole new level. If you’re still telling patients to, “Brush, floss, and use fluoride toothpaste” you’re going to be surprised by the myriad of treatment options available today. Streptococcus mutans has more to fear than stronger fluoride and more of it, as dentistry embraces oral healthcare.

At the end of this course, participants should be able to:

• Identify risk factors leading to caries.
• Explain the role of commensals.
• Implement disease management in practice.
• Safely consume a variety of candy and sugary beverages.
• Prolong the life of restorations in all patients.

The Plaque Monologues

Have you ever thought about what it would be like to have a conversation with Streptococcus

Dr. Nový is the Director of Practice Improvement at the DentaQuest Institute, and an adjunct associate professor of restorative dentistry. He served on the ADA Council of Scientific Affairs from 2011-2014, and currently acts as the chair of the CAMBRA coalition, is a member of the AGD and a clinical evaluator for the Catapult Group. The California Dental Association Foundation presented him with the Dugoni Award for “Outstanding contributions to dental education,” and in 2009, the American Dental Association awarded Dr. Nový and his office the title, “Adult Preventive Care Practice of the Year.”

US II       Friday, April 21      Dr. Ricardo Caicedo (Coltene Whaldent)

Lecture (am): “Closing the Gap” Restoring Endodontically Treated Teeth to Maximize Success

At the end of this course each participant should be able to state and describe the factors that affect the success of combined endodontic-prosthetic treatment. Furthermore, each participant should be able to integrate these factors into a meaningful pattern of application in the clinical setting based on a scientific rationale. This lecture will discuss the restoration of the endodontically treated tooth as it relates to the canal anatomy and superstructure. The combination of new standards for rotary-root canal instrumentation, root-canal obturation materials, developments in adhesive dentistry, post design, and core systems all of which contribute to predictable clinical success, will be presented.

Workshop (pm): LIMIT 25 PARTICIPANTS

Dr. Caicedo lectures nationally and internationally. He has taught numerous hands-on workshops and currently teaches the advanced level of Endodontics for seniors and postgraduate students at the University of Louisville School of Dentistry. He received his postdoctoral certificate in Endodontics from the University of Louisville, School of Dentistry. He is currently Assistant Professor of Endodontics at the University of Louisville, School of Dentistry and Visitor Professor of Endodontics, Colombian Dental College, in Bogota, Colombia. He also maintains a part-time private practice (FDP) in Louisville.

• Doctor in Dentistry from Colombian Dental College, Bogota, Colombia in 1979
• Endodontic Certificate from University of Louisville, Kentucky, USA, 1986
• Former Dean of Colombian Dental College of Bogota, Colombia 1997-2000
• Past Vice-President of the Bogota Endodontic Association, Bogota, Colombia
• Active member of the AAE since 1984
• Active member of the IADR-AAADR
• Active member and Co-founder of the IFEA International Federation of Endodontics Associations
• Private practice and teaching for 25 years.
• Former Professor of Endodontics, Department of Endodontics, LSU, School of Dentistry and Director of the Advanced Endodontic Course for undergrad-senior year at LSU, School of Dentistry
• Currently Professor of Endodontics, Department of Endodontics, Periodontics and Dental Hygiene, University of Louisville School of Dentistry, Louisville, Ky.
Lecture: “10 Solutions for 10 Every Day Problems”

Minimally Invasive Dentistry is a worthwhile goal but the practical techniques, instruments and materials are often lacking. In this fast paced, practical and entertaining lecture Dr. Clark will provide clear “Monday Morning Solutions” to solve impediments to true progress in every day dentistry. This course is designed for dentists who seek predictability, profitability and excellence in a constantly evolving profession.

Upon completion of this course attendees will:

• Have an understanding of the new model of site specific dentin preservation when accessing, instrumenting and obturating root canal systems
• Receive an update of state of the art endodontic instruments and equipment. What do you need, what can you live without,
• The 48 hour Inside Outside Bleach for dark endo teeth
• Achieve confidence in Bioclear Matrix selection and composite injection overmolding when treating Black Triangles, peg laterals, fractured incisors, and deep anterior caries
• Understand the 6 keys to consistently solid contacts with posterior composite
• Understand the direct posterior composite overlay for stabilizing cracked and/or endo teeth FOR YEARS if needed
• Appreciate why we are eliminating composite layering,
• The new role of bulk fill composites
• Understand the benefits and difference between liquefaction of composite with ultrasonic or heat energy
• The new role of biofilm removal- eliminating staining composite margins

Hands-on Workshop (pm): “Better Faster Prettier Composites” – LIMIT 40 PARTICIPANTS

Join Dr Clark to experience a unique approach to modern resin dentistry. Participants will perform injection molding to create ideal margins, rounded emergence profiles, and mirror smooth restorations in 2 exercises, Deep Anterior Caries and Black Triangles

Background: Direct composites are underappreciated in today’s world of implants and computer assisted ceramics. Yet composite can be the least invasive, most natural and wonderfully esthetic of all restorations. Realistic soft tissue dentoforms, Bioclear Matrices, 3M Filtek Supreme Ultra and paste composites, will be utilized.

Participants will prepare and injection mold fill modern class II (Clark Class II non-retentive infinity edge). Realistic soft tissue dentoforms, Bioclear Matrices, the new 3M Bulk Fill flowable and paste composites, will be used. Clinical tips for modern instruments will be shared. Dr. Clark’s recently coauthored text book “Contemporary Cavity Preparations” will set the stage for this important class. Background: Posterior tooth preparations have not been reinvented from the 1890 G V Black models.

Highlights:

• Learn and perform the 3 new steps to achieve rock solid posterior composite contacts.
• Receive an update and hands on evaluation of modern matrices, wedges and separators
• How can I best combine flowable and liquefied paste and paste composites and what is the injection molding technique
• Solutions to avoid the most common mistakes that lead to less than satisfactory results when performing anterior composites
• Discover heated composite

Dr. Clark founded the Academy of Microscope Enhanced Dentistry. He is the Director of the Bioclear Learning Centers and a course director at the Newport Coast Oral Facial Institute. He is on the editorial board for several journals and has lectured in 18 countries. He served as lecturer and researcher at CRA with Drs. Rella and Gordon Christensen.

He focuses on the re-designing of restorative and endodontic cavity preparations; an overhaul of the tragically outdated GV Black cavity shapes. For composite dentistry, this includes the non-retentive Class II preparation which requires the injection molding filling technique. Dr. Clark has developed the Bioclear Matrix System and Bioclear Method that promise a real advancement for placement of biologically appropriate and esthetically pleasing direct composite restorations for treating minimally invasive Class II preparations, diastema closure, black triangle elimination combined with papilla regeneration, traditional anterior composites, wedgeless deep subgingival anterior restorations and the Bioclear 360° Veneer. The method for these anterior restorations utilizes composite overmolding, a process which he invented and is patent pending. He has been granted several US patents.
Mark Victor Hansen, the noted co-author of the #1 New York Times best selling series, “Chicken Soup for the Soul”, says of Dave Weber… “Dave is a superstar. He WOW’s his audience to think and take action now. I predict he will become one of the top 10 speakers of our time.”

“Some Days You’re the Pigeon, Some Days the Statue”

Audience: Dentists, Hygienists, Assistants, Office Managers, Students, Spouses

Boy, truer words were never spoken!! Come prepared to laugh and learn as one of our country’s funniest and most sought after dental speakers discusses what many doctors and staff feel is the most challenging part of their practice …………… THE PEOPLE!! Doctors and patients……

Doctors and staff……..staff and patients…….. staff and staff…….. (heck, even husbands and wives……..parents and children)
RELATIONSHIPS!!! It all boils down to relationships and the amazing impact that our communication has on the culture and climate of a practice or home.

Learning outcomes:
1. Discover the 6 most powerful words in the English language and when to use them
2. Learn the secret to bringing out the best in the people we work with and patients we serve
3. Develop a proven process for drawing people closer

Dave Weber is an internationally recognized keynote speaker, trainer, author and humorist when it comes to helping people make progress on purpose…. and he has the track record to prove his techniques work!

An honors graduate from Mercer University, he simultaneously captained the university’s NCAA Division 1 soccer and volleyball teams for three years and was accorded All-Conference honors in both sports.

Upon graduating in 1984, Weber began his professional career at Motorola. After three years of award-winning selling and training, he left corporate America to launch his own speaking and consulting firm.

Since 1987, Weber has been one of the country’s most sought after speakers. Presenting 165 times a year, his high energy and entertaining style have made him a crowd favorite. While his style might initially get him invited to present, it is his great content and timeless principles that get him invited back time and time again.

Location: The University Center at Kent State • Stark Campus • 6000 Frank Ave., NW • North Canton, OH 44720 • (330) 244.3300
Registration 8 am • Program begins at 8:30 am • Lunch at noon • Adjourn at 4:30 pm

CEO / President,
Weber Associates

Outstanding info for the entire Dental Team!

### SINGLE LECTURE REGISTRATION

#### US I  Friday, February 17 • 7 CE

- **Dr. Brian Novy**
  - "How to Eat Candy"
  - $250.00  $355.00  $125.00  $95.00  $155.00

#### US II  Friday, April 21 • 7 CE

- **Dr. Ricardo Caicedo** (Coltene Whaldent)
  - "Closing the Gap" Lecture + Workshop
    - $250.00  $355.00  $125.00  $95.00  $155.00
  - Lecture Only
    - $150.00  $215.00  $75.00  $57.00  $93.00

#### US III  Friday, May 12 • 7 CE

- **Dr. David Clark**
  - "10 Solutions" Lecture + Workshop
    - $250.00  $355.00  $125.00  $95.00  $155.00
  - Lecture Only
    - $150.00  $215.00  $75.00  $57.00  $93.00

#### US IV  Friday, November 17 • 7 CE

- **Dave Weber**
  - "Some Days You're the Pigeon, Some Days the Statue"
  - $250.00  $355.00  $125.00  $95.00  $155.00

---

◆ **New for 2017: GROUP PRACTICE PRICING.** A group practice may purchase the Full Series for the registration fees listed. This allows one doctor from your practice to attend each lecture with a limit of one doctor per lecture. If two doctors from the same practice wish to attend the same lecture, the $250 single registration fee will apply. A staff member may attend a lecture if no dentists from the practice are attending that lecture.

★ Hands-on workshops available in afternoon sessions for University Series II and III. Workshops are limited to 25 participants for April 21/Caicedo and 40 Participants for May 12/Clark and will be made available on a first-reserved basis. All Registrants including Full Series Registrants: please indicate by marking the appropriate box if you wish to stay for either workshop in the afternoon.

---

**FULL SERIES REGISTRATION DEADLINE January 30, 2017**  **Single lecture deadlines are always 1 week before each lecture.**
